Regular Price

Console/Desktop: 9.99 USD
Android/iOS: First world free, 4.99 USD full campaign unlock

About the Game

Description

Professor Doctor Jetpack is a skill-focused, physics based lunar lander game in which you embark on a dangerous journey to ... control your jetpack. And to save the world. Alongside the digitally preserved mind of Albert Einstein, a.k.a. "Professor Doctor Jetpack", players will explore an intricate cave system of over 85 handcrafted levels, within four distinct biomes. Each biome features a unique boss encounter that will put the players' flying skills to the test.

Background

Professor Doctor Jetpack has been a passion project of ours, with the first rudimentary prototype taking shape right after the release of our first game *Human Cannonball*. It took the release of a second game (*Unimime - Unicycle Madness*) and the successful application for video game funding from the German Federal Ministry for Economic Affairs and Climate Action (BMWK), for us to be able to focus on the production of *Professor Doctor Jetpack* in 2022.

Features

- Physics based balancing game
- Fun to learn and hard to master
- Atmospheric pixel art
- 85+ handcrafted levels
- 4 unique bosses
- Unlockable and upgradable equipment
- Casual mode: Jetpack with "training wheels"

About Roflcopter Ink

Background

We are a small, independent game development company based in Munich, Germany. Founded in 2015 by Timo Decker and Clemens Kaiser, we are still a two-person team, focusing on creating fun and accessible games that we enjoy playtesting.

Team

Timo Decker - Art, Design, Code

Clemens Kaiser - Code, Audio
